

Graphene-enhanced heat transfer for cooling systems

WHAT IT IS

A graphene additive for water-glycol coolants and heat-transfer fluids.

WHERE IT'S USED

Engine cooling systems, industrial chillers, process cooling loops and heat exchangers.

HOW IT'S SUPPLIED

Liquid concentrate. Graphene pre-dispersed in a water carrier. Supplied in 1 GAL (3.78 L) black HDPE 1 gallon jug. Bulk quantities on request.

DOSE

Typical dose 1% to 7% by weight depending on the job; see the technical data sheet.

SIZES

1 GAL (3.78 L)

TESTED PERFORMANCE

6-18% better heat transfer vs glycol in internal lab testing

SDS and technical data sheet available on request. Shake well before using.
